

## Evoflex™ with ArmorGrip™ Seamless Polyurethane Flooring

As a discerning owner of an equine facility, you will prefer our cushioned Evoflex™ Seamless Polyurethane Flooring because it has been designed as a tough, comfortable, slip resistant hygienic floor. Evoflex™ Seamless Polyurethane Flooring is unique: the floor is totally seamless and impermeable allowing the floor to kept clean and germ free. The base mat is made of a special rubber-foam compound that provides resiliency and comfort. The base mat is reinforced with a polyester fabric to provide dimensional stability and point-loading support. The base mat is topped with Armorgrip™, which is a specially formulated polyurethane non-slip safety coating.

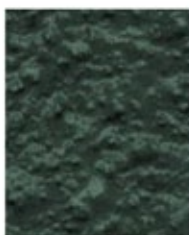

Armorgrip™ is a powerful, long lasting and user-friendly floor coating that offers excellent slip and fall protection while at the same time protecting the overall surface from damage. The Armorgrip™ coating contains specially treated rubber granules [which create the structured finish] that are made from recycled rubber. Armorgrip™ bonds to wood, metal, concrete and to itself, making it easily repairable if necessary. Armorgrip™ is waterproof, resilient and UV resistant.

The overall result is a virtually indestructible, seamless, safe and resilient equine floor.
